

## **Our Classroom School Day**

**Below is our typical day at school. You can modify this to work for you, but it would be best to space your child's "school work" time throughout the day. Set a timer.**

### **9:10-10:15 Math**

We do math "stations" during this time. Each station is 20 minutes long. You could do this at home with a timer and structure it like this:

**Station 1:** "Independent Practice" (complete assigned Seesaw work)

**Station 2:** "Math Games or iPad" (work on Freckle, Khan Academy or play a game)

**Station 3:** Work with Teacher" (while they're working in "games," check their work or have a sibling check their work. Then use this time to go over the work with your child and have them fix it. You may want to write a new problem similar to the one they got wrong to fix.

### **10:15-11:00 Science/Social Studies**

Students can work on Science or Social Studies work during this time.

### **11:00-12:00 Recess & Lunch**

Please make sure you make some time to exercise and run around. It is very important for your child (and you!)

### **12:00-12:45 Writing**

### **12:45-2:10 Reading**

This may also be a good subject to do in "stations." Set a 20 minute timer for each station.

**Station 1:** Work on assigned Seesaw work

**Station 2:** Independent Reading (a book of their choice)

**Station 3:** Work on Freckle or Reading Response for 40 BC, if you have workbooks or any other resources this would also be a good time to work on that

**Station 4:** Read aloud- This is important. Download a book and let your child listen to someone else read, or read to your child.

### **2:15-3:15 Specials**

Work on spanish, art, or music- practice piano, do an art project, and get some exercise again!
